## Software Engineer & Data Enthusiast

Recent Computer Science graduate passionate about developing impactful, high-quality software solutions. Experienced in building scalable, secure applications using modern frameworks and cloud technologies. Adept at quickly learning new tools, collaborating across disciplines, and solving complex problems with precision—driven to contribute to software that improves lives on a global scale.

## Education

|                                     |                                                                                                                                                                                                                                                                |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08/2020 – 05/2024<br>Pittsburgh, PA | <b>Bachelors of Science in Computer Science</b> , <i>University of Pittsburgh</i> 3.3/4.0 GPA<br><i>Relevant Coursework:</i> Software Engineering, System Design, Cybersecurity, Programming for Web Applications, Software Quality Assurance, Data Analytics. |

## Professional Experience

|                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 04/2025 – present<br>Seattle, WA (Remote) | <b>Software Engineer Intern</b> , <i>Sinclair Broadcast Group</i> <ul style="list-style-type: none"><li>- Designed and implemented a <b>modular React + TypeScript application</b> to modernize a broadcast system, improving scalability and maintainability.</li><li>- Integrated <b>AWS services</b> (API Gateway, Lambda, S3, CloudFront) to enable secure, high-performance content delivery.</li><li>- Collaborated with cross-functional teams to deliver <b>real-time weather and emergency alert features</b>, supporting public safety and user engagement.</li></ul>                      |
| 05/2023 – 08/2023<br>Pittsburgh, PA       | <b>Data Services Intern</b> , <i>Federal Home Loan Bank Pittsburgh</i> <ul style="list-style-type: none"><li>- Developed and executed <b>latency testing procedures</b> for migration of 200+ Tableau dashboards to a cloud environment, ensuring minimal disruption to critical business operations.</li><li>- Managed and audited <b>role-based access controls</b> in Tableau, maintaining compliance and reducing security risk.</li><li>- Partnered with business units to align technical solutions with stakeholder requirements, ensuring a positive internal customer experience.</li></ul> |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Run3TV Broadcast Replacement App</b> , <i>React, TypeScript, AWS</i> <ul style="list-style-type: none"><li>- Engineered a <b>full-stack, cloud-enabled video delivery system</b> with real-time data integrations.</li><li>- Optimized for <b>cross-platform compatibility</b> (Smart TVs, mobile devices), ensuring seamless performance across environments.</li><li>- Applied <b>agile development practices</b> to quickly iterate features based on feedback.</li></ul> |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Skills

**Languages:** JavaScript (ES6+), TypeScript, Python, Java, SQL  
**Frameworks & Tools:** React, Flask, Flutter, Vite, Git, Docker  
**Cloud & Data:** AWS (S3, Lambda, API Gateway, CloudFront), Tableau, Databricks, Excel  
**Core Competencies:** Analytical Thinking, Problem Solving, Adaptability, Collaboration, Attention to Detail

## Certificates

**AWS Certified Cloud Practitioner (CLF-C01)**  
Amazon Web Services,  
Aug 2023
